

HOW MUCH WATER

WHAT WATER WOULD YOU DRINK?

Many people feel anxious about the condition of drinking water, polluted water sources, and chemicals contained inside the water. In the urban areas, the main water source such as lakes and rivers have already been polluted. Human should put more concern to the quality of water source that we consume every day.

As we know, water is the most valuable substance after oxygen on this planet Earth. Without water, creatures on this earth will eventually die. Furthermore, 75 % of the human body is composed of water. Many vital organs of the body even contain more than 95% of water (e.g., brain). Because of its importance, we should pay attention to our daily drinking water.

Lack of water will lead to many diseases, degrade our body function, and fasten our body cell aging. When the body is dehydrated, the body will absorb water from the blood. As the result, the blood becomes thickened and the cell experiences Nutrition deficiency, Blood Vessel Blockage, stroke, and ultimately brain dead. Thickening of blood causes difficulty to dispose the toxins and poisons from the blood circulation. Finally, impaired nerve function, aged cell, and death of body organs will be the severe impact of continuous chronic dehydration.

Many people think that water is only an ordinary liquid to drink. When people feel thirsty, they often drink Flavored and Carbonated Drinks, coffee or tea. Whereas body requires WATER instead of soft drinks, flavored or sugary drinks. Therefore for many years, scientists are looking for the knowledge of gaining body health through water. In the 21st century, they have discovered that human body needs H₂O in which has the same molecules structure with our body. It is very important for us to know that H₂O Molecular Structure and Molecular Bonding between the waters should be arranged uniformly to optimize the drinking water's function in the body.

The different molecules arrangements influence the usage of water to the body's health. Imagine that the atom C (Carbon), O (Oxygen) and H (Hydrogen) when arranged in different number and arrangement will form different functions: C₆H₁₂O₆ is Sugar Sucrose, C (Carbon) in the tenuous structure will form CHARCOAL (Coal) that are fragile, black and used as fuel, while C (Carbon) in tight structure will form clear, hard and valuable DIAMONDS / GEMS.

This fact shows that the water in different structures will also have different characteristics. If you care about the health of your body, what kind of water are you drinking?

OW MRET WATER

OW MRET Water is water with low levels In-Organic Mineral that has been added adequate Oxygen and has undergone a process of activation by the influence of the magnetic field resonance. The magnetic resonance always moves at a particular frequency of water molecular structure. The process of generating resonance of water molecules is associated with quantum transitions in klarate microactivity, a multifrequent and not linear process. This technology is called Mollecular Resonance E-Magnetic Technology, which produces long term activated water molecular structure. Different with the other water that its molecular structure only retained for few hours or day. OW MReT Water also has more informative natures such as permittivity and dielectric viscosity compared with other drinking water.

OXYGEN

Oxygen (O₂) is a substance needed by all living creatures in running each of their life activities. There is no substance as important as Oxygen and there is noother substance that can replace Oxygen's function in our body systems such as respiration, cell growth and cell regeneration. We are still able to survive without food for 40 days or 7days without water, but we only can live for a few minutes without Oxygen. Therefore, Oxygen is the key for the cells to grow, mature, and regenerate.

Of course, the body does not only require oxygen alone, but also nutrients, substances, and essential amino acids to maintain cell regeneration, metabolism and the body's immunity.

Oxygen is more soluble in the water comparing with nitrogen. Oxygen solubility in water is highly dependent on water temperature. At 25 ° C and 1 standard air pressure, water contains only about 6,04 milliliters (mL) per liter of oxygen content (6,04ppm). While human body requires enough oxygen to run its function. OW MRET Water has been added approximately 28 ppm (28 milliliters oxygen per liter of water).

Benefits of Oxygen in the body:

- To increase intelligence and improve nerve function,
- To maintain cell hydration and cell regeneration
- To increase the absorption of nutrients, vitamins, amino acids and proteins
- To prevent the growth of cancer cells and dispose the toxins
- To reduce asthma and allergy of the body
- To prevent stress and nervousness,
- To kill an-aerobic bacteria, parasites and microbes,
- To strengthen contraction of heart rate and increase aerobic stamina of the body,
- To boost immunity and improve sleep quality,

- To maintain youthful and elastic skin and prevent premature aging,
- To increase fat burning in the body,
- To stabilize blood pressure.

There are many diseases of the modern age arise due to lack of Body Fluids and lack of oxygen. De-hydration and de-Oxygenation is the source of chronic disease that causes physical health declined and gradually leads to cell death. On the other hand, sufficiency of Body Fluids and Oxygen will allow body to regenerate cells, increase the absorption of vitamins and nutrients, boost the immune system, and neutralize toxic substances in the blood stream. A good body's metabolism is the start of the body health..

Dr Otto Warburg, a renowned expert in biochemistry and also the winner of the Nobel Prize twice states that *the cancer cells can not grow and develop in the body that has high content of Oxygen.*

DrFreibott, also states that *the lack of oxygen (O₂) in large quantities will inhibit biological cell regeneration.*

Dr Parris Kidd, states that *oxygen plays a very important role in the body's immune system, making it immune to disease, bacteria and viruses.*

Dr Steven Levin, states that *oxygen deficiency is a major cause for all diseases. Moreover, oxygen deficiency in the blood has caused a decline in the immune system, and the possibility of causing cancer, leukemia, AIDS and neurological disorders.*

Dr William Kock, states that *treatment with oxidants consumption such as oxygen is very effective in treating cancer, leprosy, diabetes and diseases of contact with the virus.*

Low Inorganic Mineral Water

More than 1 liter of water enters our body every day, and it resulted in the waste in our body if the water we drink contains inorganic minerals. The waste from inorganic minerals will make the kidneys and digestive system works heavier.

Have you ever thought about the quality of the water you drink? There is even a saying, “your health is determined by what kind of water you drink every day!”

Dr Norman W. Walker, said *that people who drank two glasses of water per day in the 70 years of his life, will include a 17,000 liter water.* You can imagine how much in-organic mineral such as Calcium Carbonate, Magnesium, Phosphor accumulated in the body. Drinking water is processed through kidney which has channels of small arteries and blood vessels. If the level of inorganic mineral contained is quite high, it will cause various diseases such as gallstones and kidney stones. Therefore, drinking water that has low levels of minerals Inorganic will make healthy habits to prevent various diseases.

Not all of the minerals in the water can be absorbed in the human body cells. Especially water that contains a lot of Inorganic minerals which pass through the intestinal wall, enter the lymphatic system, and circulate in our blood can cause various diseases.

Dr Charles Mayo, on Mayo Clinic, states that the human body also needs organic minerals that commonly found in foods that come from vegetables, fruit and meat. While all kinds of inorganic mineral and must be eliminated - the opinion of Dr. Allen E Banik MD (The Choice Is Clear).

The greatest damage caused by Inorganic mineral is small arteries and blood vessels constriction. Hardening of the arteries and calcification of blood vessels occur when your body starts swallowing Inorganic minerals and water mineral that you drink into your body. Dr Paul C. Bragg, N.D, Ph.D (Water The Shocking Truth). Dr N. W Walker into Water Can Undermine Your Health, stating that blood contains the largest being of the water.

The human body consists of 70% water. Water is the most important substance in human life. The water content in our body: 90% Brain, Lungs - pulmonary 85%, 75% heart, liver 86%, 75% muscle, and Blood 90%

The function of water in the human body:

- Establish new cells, maintain healthy cells and replace damaged cells
- Dissolve and circulate nutrients, oxygen and hormones to cells throughout the body.
- Dissolve and secrete substances - waste substances from the body
- As a catalyst in the body
- As lubricants for the joints
- Stabilize the body temperature
- Reduce conflicts of vital organs in the body

In addition to the amount of water that the body needs, which are about 2.5 liters per day, it is necessary to understand whether we have eaten and drunk according to the standard requirements needed by cells in our body. Besides the quantity of water we should drink, it is also required an understanding of the quality of the water that goes into our bodies. Acidic water that has PH below 5.7 drives the body to neutralize the acidity by drawing the water in the body which usually is derived from the blood. This will result in levels of blood viscosity becomes thickened and makes the blood flow rate becomes slow, which will cause the cell nutrition and metabolism of cells to be blocked.

Similarly, if the amount of drinking that enters the body is alkaline of which pH is greater than 8, it will form a colloidal with Kation such as calcium, magnesium, iron and make the deposition in blood cells and lymphatic channel body. Therefore, the best pH level for drinking water is about 7 or Neutral.

Reducing levels of sweetness of sugar, salt and less salty drinks and food with acidic or alkaline pH, will result in a health body. The kidneys are not burdened with the kidney filtration process. The cell regeneration process can also run better. Remember when you feel

thirsty, the quality mineral water must be considered to meet the standard requirements of quality water needed by the body.

Although naturally human body already has an Inorganic mineral and toxic disposal mechanism but it has limited capabilities. If the body's tolerance limits exceeded, then the rest of the disposal will accumulate in our bodies and result in:

- Heaps of Inorganic mineral, resulting in urinary stones and kidney stones.
- Precipitation on the walls of blood vessels, can lead to cholesterol, liming and deep vein thrombosis
- Stockpiles in the bile will lead to gallstones
- Stockpiles of the eye resulting in cataracts
- In the liver will extend to Cirrhosis (Liver Cancer)
- Stockpiles in Pancreatic Beta will inhibit the production of insulin
- What is buried in the body and surrounds the body cells, it will block the oxygen in reacting with nutrients on the cells, which can cause cancer
- Stockpiles in the gut will interfere with the absorption and digestion

Molecular Resonance E-magnetic Technology (MRET)

MRET Water is the process of preparing the molecular structure of water with a low frequency electromagnetic technology. As the result, it has a uniform molecular structure of the angle of 104.5 degrees, becomes very small clusters, and forms a perfect Water Crystals.

In the formation process of MRET Water, electromagnetic wave is printed into the water, thus making a bonding configuration of Atomic Hydrogen Molecule Air with Oxygen strong and in uniform shape. Water ACTIVATION process does not use CHEMICAL PROCESS but uses PHYSICS PROCESS. Thus making the characteristics of the water becomes special because it resembles the water structure of the body cells. The MRET Water when consumed by the body will be easily absorbed by the cell walls and maintain the body's cells function runs perfectly.

The water molecule consists of two pieces of Atomic Hydrogen and one Oxygen atom (H_2O). In the human body, there are two basic types of water: i.e.,: Bound water (clumping water molecules) and Structured water. (Structured water molecules). The smallest cluster of MRET Water is able to move freely until it reaches the "Cell wall" so it is absorbed faster by the body cells. It enhances the function of Cells Nutrition Transportation to remove body wastes and maintain good Communication between Body Cells.

MRET Water programmed specifically in certain frequencies using electromagnetic waves similar to the electromagnetic waves of the body that makes the vital organs of the body will be able to recovery (restore) the body's normal functions.

Energy spectra of the human body are between 3 to 45 μm and the MRET Water process is carried out in the same spectrum that is between 4 s / d 14 μm . This is a low energy spectrum of the human body.

MRET Water is the smallest water cluster, the highest molecular energy, Fastest resonance frequency which is very intensive in the vibration wave.

Pure MReT Water does not use chemical process and best stored at room temperature, and away from strong-smelling substance.

MRET Water can be measured using **Quantum** Spectrometer Electronics measuring instrument.

MRET Water is processed by clicking on the activation of the water with low levels of inorganic minerals and has been added considerable Oxygen (28 ppm) with the influence of the magnetic field resonance that always moves at a special frequency to the molecular structure of water. And there is a process of generating resonance of water molecules. This process is associated with quantum transitions in non-linear microactivity clarify and a multi-frequency process. MRET water can be in an activated state in the long term. It has more informative nature such as permittivity and dielectric viscosity that has changed from plain water.

ADVANTAGES of MReT WATER

There are many advantages of consuming MRET Water regularly

- Improve Cells Oxygenation, increase Cells flexibility, regenerate the cells, and rejuvenate the cells.
- Increase hydration and transport nutrients throughout the body Cells.
- Enable the formation of water molecules in a long structure. So that cells more easily absorb MRET Water Absorption.
- Increase body detoxification and reduce free radicals
- Improve Blood Circulation and Metabolism throughout the body.
- Clean the blood channel and remove blood channel blockages in the capillary.
- Strengthen and increase the capacity of red blood cells, increase the exchange of gases and nutrients between Cells and Capillary blood vessels and strengthen body Metabolism
- Reduce viscosity or blood thickening and Prevent blood vessel blockage and prevent clogged capillary tube which causes high blood pressure.
- Help Normalizing Body Alignment System Functions.

MRET Water Conditioning consuming process:

Some people who drink MRET Water experienced Body Conditioning on first consumption.

The conditioning process that occurs when a person consumes MRET Water : experience discomfort, dizziness, heart pounding faster, Stomach feels heartburn, frequent urination,. These are just initial conditionings of the Body Conditioning System in improving cells and body function.

Preconditioning when drinking MRET Water is different for each person. Some people experience the effects of conditioning and some others are more resistant to the effects of this conditioning.

Healthy people are more resistant to the effects of conditioning when they first consume MRET Water. There are also people who ever had serious illness that experience a stronger effect of the conditioning.

Water that has been activated will facilitate the entry into cells and blood vessels so that it will react quickly to every cell. This activated water will function to:

- Prevent clumping of the blood cells
- Prevent the formation of cells with irregular bond
- Reduce free radicals in cells.
- Generate energy cell
- Prevent Cancer

This activated water has helped people with high blood pressure, stroke, triglycerides, cholesterol, diabetes, cancer, abscess, smoothen the skin, cystic acne, nourish hair, migraine, sore-aches, muscle tension, impotence self, young and etc. And many testimonies have proved that with smooth and healthy blood flow, the body also becomes healthy. Many treatment concepts basically are to improve the blood circulation. Therefore, blood is the carrier of nutrients and Oxygen to all body cells.

MRET Water Helps:

- Stabilizing blood pressure,
- Stabilizing blood sugar levels,
- Lowering uric acid and cholesterol,
- Preventing stroke and cerebral palsy,
- Preventing migraine,
- Preventing impotence,
- Preventing Hepatitis,
- Enhancing immunity and reduce allergy
- Increasing the concentration of the brain,
- Streamlining blood metabolism,
- Improving the work of the stomach (gastritis),
- Improving and activating the nervous system,
- Preventing swelling or inflammation,
- Normalizing cardiac function,
- Helping to accelerate the absorption of Oxygen,
- Improving the function of the intestines to digest food,
- Improving the process of formation of red blood cells,
- Helping to accelerate the absorption of nutrients,
- Overcoming constipation and constipation,
- Eliminating toxins (detoxification),

- Weakening of bacteria, viruses, abnormal cells (cancer cells),

Before consumption

After MreT Water consumption

OW MReT WATER PRODUCTION PROCESS:

OW MReT water is processed through stages that are strictly controlled by the Quality Control personnel who are experts in their field and a Health Analyst that is responsible for generating high-quality products according to standard OWMReT Health Drinking Water. The MReT process includes uniforming molecular structure of H₂O, adding 28 ppm oxygen and reducing the content of inorganic minerals and heavy metals.

So every drop of water consumed maintains the health of your cells for longer time.

PRODUCTION PROCESS CHART FLOW:
